

yerso.com is an information exchange platform which is created to serve people and organizations as a center for broad and reliable information.

The main purpose of this platform is to create a national gateway, hub, interaction and engagement for relevant stakeholders.

It is a strategic and sustainable tool to open doors for investments, partnerships, market exchanges, foreign exchanges, opportunities, spotlights, attractions, image projection, researches, innovations, collaboration and more importantly it paves ways for the development of the sector and the economy in general.

Nowadays, sharing information becomes a basic need for day to day life of modern people. Hence, Yerso.com will serve as a dynamic, vibrant and instant information exchange and market place for national regulators, private companies, governmental and nongovernment organizations, the public and related stakeholders.

and instant information exchange and market place for national regulators, private companies, governmental and nongovernment organizations, the public and related stakeholders.

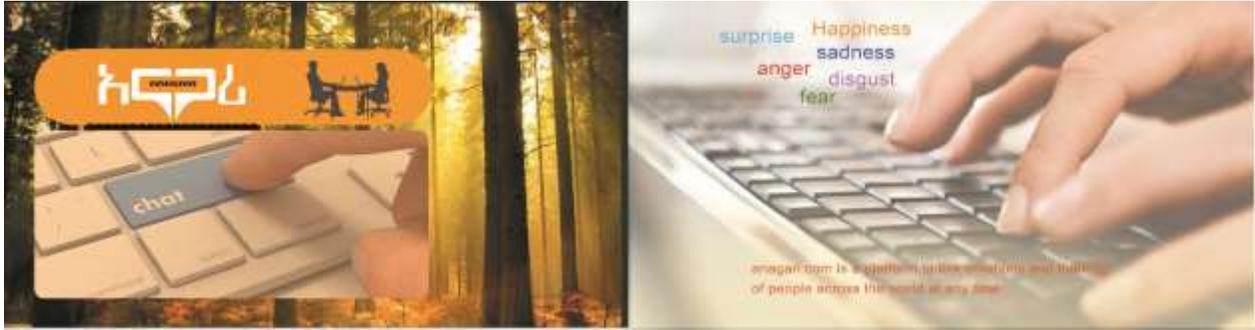

Yerso will be able to solve decades long held custom challenges of delay of information. It will be able to resolve waiting, idle & underutilization of resource. Illuminate complaints, frustrations, confusions, irregularities.

It will give a supreme correspondence, exchanges, sharing, transaction, conversations, deal making, informing and engagement.

Yerso will change the world into a new level of simplicity, comfort and convenience within the reach one's of fingertips.

With the enabling of the platform stakeholders, **Yerso** will be able to access, disseminate, interact, filter, chat, exchange, post, select, comment, give feedback and collaborate on a range of issues related to any sector. Such as partnership, project ideas, bids, jobs, funds, information, news, announcements, tariff, tax, new products & services, culture, indigenous & historical scenes, rules & regulations, investments, exhibitions, events, workshops, projects, agreements, researches, innovations, promotions, entertainment, service rendering, awards & recognitions, competitions, call for paper, survey, statistics & data, charities and other vital key categories.

The purpose of this platform is to open up a moment chat session for those individuals and stakeholders only whenever their emotions and feelings match at that specific moment.

It would be a vital instrument in making sure people across the world with the same emotions at that instant time to share their experiences and moments whenever there is an exact match of words & characters in their posts.

The platform would give solutions to long held traditions and challenges in the areas of boring chats, unmatched interests, unwilling conversations, never lasting conversations, redundant back and forth meetings, time killing moments, lack of heartfelt exchanges, inefficient time passages and lack of happy moment stays. But with the introduction of this platform users, individuals and stakeholders will be able to sign up their profile page and start to post their current emotions for character between 15 to 150.

The chat sessions will be opened whenever there is an exact match of emotion posts between two users or more within 10sec and the chat session will be closed automatically after an hour.

With the enablement of **anagari** platform users, individuals and stakeholders will be able to get various people with the same emotions and life journey which could share them support, joy, stories, lending hand, experiences, knowledge, opportunities, life dynamics, work realities and overall it open doors for real communications, emotions, experiences, touches, understanding, sharing and a new kind of cooperation.

This platform would be a vital tools and platform for the introduction of a chat interaction with much more similarity, interest, understanding, connection, in-depth touch, mind reading, easiness, surprise and high expectation which at the same time would support the creation of hopeful, happy, straightforward and trustworthy social communication and cooperation.

The purpose of this platform is to create a decision-making tool for the public and relevant stakeholders. It will serve as an instant selection and decision-making tool for relevant stakeholders, government actors, the public, investors and others to select a wide range of options based on their needs from the existing choices of hundreds of thousands of business operators, investors and various institutions throughout the country.

The platform will be able to give a lasting solution for decades long held traditions and challenges of wrong decisions, bad selections, biases, influences, unverified accounts, partial considerations, wrong perceptions, rent seeking, empowerment of the wrong providers, lack of value addition and continuous wrong choices in to a new level of choice, decision and selection enabling tool based on our demands, analysis and interests.

With the enabling of the platform the public, businesses, investors and stakeholders will be able to select the right partners, operators, investors, entertainment places and other stakeholders based on their

interests, requirements, priorities, challenges, needs, limitations and various standards and parameters. The range of parameters, principles and options of selection include but not limited to price, language, reachability, available tools, facility, infrastructure, security, value added service, customer support, experience, reputation, awards, expertise, technology access, payment scheme & method and others based on the kind of stakeholder's selection and choice.

It would be a strategic and sustainable tool to open doors for more competitions, value addition, standards and qualities, facts, customer satisfaction, understanding key challenges, research & innovation, fulfilling promises, transparency, verification, performance, investments, business sector development and overall the growth of the economy.

The purpose of this platform is to create a national policy, rules & regulation and proclamation formulation, enforcement, execution, follow-up and revision tool for relevant stakeholders.

It will serve us a hub for the analysis, follow-up, statistics, feedback, irregularities, complaints, verification and intelligence of policy related formulations, executions and revisions for various national actors and more importantly to the national regulators. It will be a means by which policies across the sector are not in conflict with each other, it will make sure big national plans are not contradicted by the specific sector policies and rules, it will avoid re-writing rules & regulations frequently every time various problems pop-up, it will be a means to stop unnecessary confusion and disruption related to the sector when new proclamations emerge and overall it would be a mechanism to create a sustainable and well thought and analyzed policies and regulations in the national sector.

Above all the platform will be a means to solve decades long held traditions and challenges from the perspectives of incompliance, irregularities, confusion, temporary resolution, seeing specific angles, disintegrated journey, lack of holistic view, unrealized consequences, lack of check & balance, thinking within the box and unverified perspectives would immediately convert to a system of package that sees, checks, match and verify every bits at the smallest level.

With the enabling of the platform stakeholders will be able to participate, give feedback, interact, suggest, complain, fill surveys, post their priorities and challenges, fill in their requirements, recommend and constantly engaged with policy makers and regulators on the aspects of new bills, formulation of policies, enacting and execution of proclamations, revising regulations, correction of bills, reconciliation of policies, analysis and gathering of statistics and data and various phases of policy cycle.

The purpose of this platform is to create business actors' feasibility analysis, foundation and formulation tool for business related stakeholders.

It will serve as a guiding, feasibility analysis, insightful and establishment framework for the various stakeholders and actors such as business regulators, business operators, business owners, various sectors, firms, individuals, donor organizations, development partners, tourism transformation agencies, the public and related stakeholders.

The platform would be able to solve decades long held traditions and challenges of wrong establishment, unclear missions, influenced strategies, unverified opportunities, misinterpreted claims, cooked data, failed perspectives, wrong perceptions, wrong timing, uncalculated risks, unsecured potentials, unchecked priorities and investments in to a system which will guide, inform and support you on the whole formulation, establishment and coming in to the market.

With the enabling of the platform stakeholders will be able to access, understand, analyze, formulate, compare, select, navigate and picture on a range of parameters and principles that are vital for the foundation, establishment and formulation of business actors and stakeholders.

The range of parameters and principles include existing gaps in products and services, customer priorities and requirements, public key demands and needs, various missing links, high return investments, researches and innovations, the public challenges and priorities, stakeholders key interests and requirements, available opportunities and potentials, applicable funds, working models and perspectives, various reports and in depth analysis and overall a range of parameters that are vital for the establishment, foundation and formulation of new business actors and stakeholders.
